Dear Sandy

FORMOSA AMENITY GARDEN, OPEN SPACE AT THE REAR OF 4-54 WARRINGTON CRESCENT, W9 1ED

PROPOSED LONG TERM MANAGEMENT PLAN FOR FORMOSA AMENITY GARDEN

I refer to the resolution of Planning Applications Committee no. 3 on 22 March 2016.

The Committee resolved:

That the Committee agrees that the proposed long term management plan for Formosa Amenity Garden is acceptable, including:

- The principle of tree removal and replacement
- The timescale of tree removal and replacement
- The numbers and species of replacement trees and the intended garden design.

Whilst this is not a formal application for consent to remove trees, it is an endorsement of the management plan, in order to provide assurance that future applications for tree removal are unlikely to be refused consent provided the plan is being implemented.

For the avoidance of doubt in the future the documents referred to at committee were:

- Proposed Long Term Management Plan for Formosa Amenity Garden London W9 dated September 2015, excepting the plans and schedules of trees, which contained some discrepancies.
- Your email to me of 02 March 2016 clarifying the planting plans and schedules

After Committee, I received the updated and corrected plans (Garden Masterplan April 2016) which will be the Council's reference for future compliance with the masterplan.

Many thanks for your assistance, and sincere apologies that you have had to wait so long to receive this letter.

Yours sincerely

Barbara Milne
